Serial No. 09/716,656

Art Unit 1616

The information disclosure statement filed July 30, 2001 and the preliminary amendment filed November 20, 2000 have been received.

Restriction is required under 35 U.S.C. 121 and 37 CFR 1.142 between the following inventions represented in claims 1-20.

Applicant is reminded that in order for a patent issuing on the instant application to obtain the benefit of priority based on priority papers filed in parent Application No. 09/171,700 under 35 U.S.C. 119(a)-(d), a claim for such foreign priority must be made in this application. In making such claim, applicant may simply identify the application containing the priority papers.

This application contains claims specific to more than one invention of synergistic combinations.

Applicants are required to (1) elect a single disclosed synergistic combination of specific compounds even though the requirement be traversed and (2) to add a claim(s) directed to that specific combination of compounds.

The inventions above are independent and distinct and does not require the other for ultimate use. They have different fields of search which are not coextensive. It is also noted, that one specific synergistic combination of compounds is known to be chemically distinct from another specific synergistic combination of compounds, and a reference to one combination would not necessarily be a reference against the other combination under 35 USC 103.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Allen J. Robinson whose telephone number is (703) 308-4524.
